DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Wei Te Chung on January 7, 2003.

The application has been amended as follows:

In Claim 1, Line 8, after "PCB" add --, a plurality of passageways is defined in the tongue and extending through the rear wall, and the contacts are received into the passageways, the contact has a securing portion locating between the engaging portion and the solder portion, the securing portion securing in the passageway, the solder portion of the contact comprises a leg portion extending from the securing portion and a foot portion extending from the leg portion and bent in a right angle so as to be parallel to the rear wall of the housing, the solder portions of the contacts are arranged in two rows, one row being close to the rear wall of the housing and the other row being far away from the rear wall of the housing, the connector further comprises a pair of board locks mounted to the bottom wall of the housing, the board lock is made of metal material, the board lock comprises a mounting section at a top thereof, which is

assembled into the bottom wall of the housing, and a retaining section below the mounting section which is adapted for being mounted in the PCB.—

Please cancel Claims 2-15.

Allowable Subject Matter

2. Claim 1 is allowed.

The following is an examiner's statement of reasons for allowance:

Takemasa (U.S. Patent No. 6,045,408) disclose a connector comprising: an insulative housing (20) having a mating space (between 23 and 20), and a plurality of contacts (50) each having an engaging portion (51) and a solder portion (55) bent in right angle so as to be parallel to a rear wall (29). See Figs. 1-6.

Azuma et al. (U.S. Patent No. 6,024,608) disclose connector (1) for being soldered to a printed circuit board (PCB) (K1), comprising: an insulative housing (10) having a mating space (inside 10), and a plurality of contacts (16) each having an engaging portion (20) and a solder portion (23) bent in right angle so as to be parallel to a rear wall for being soldered to the PCB (K1). See Figs. 1-9.

Koseki et al. (U.S. Patent No. 6,155,886) disclose connector (3) for being soldered to a printed circuit board (PCB), comprising: an insulative housing (30) having a mating space (32), and a plurality of contacts (10) each having an engaging portion (121) and a solder portion (15) bent in right angle so as to be parallel to a rear wall for being soldered to the PCB. See Figs. 1-8.

Application/Control Number: 10/632,478
Art Unit: 2833

Page 4

However, the references fail to teach, disclose, or suggest, either alone or in combination, the solder portion of the contact comprises a leg portion extending from the securing portion and a foot portion extending from the leg portion and bent in a right angle so as to be parallel to the rear wall of the housing, the solder portions of the contacts are arranged in two rows, one row being close to the rear wall of the housing and the other row being far away from the rear wall of the housing and in combination with the rest of the limitations of the base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamada et al. (U.S. Patent No. 5,057,027), Azuma et al. (U.S. Patent No. 5,971,800), Chan et al. (U.S. Patent No. 5,626,482), McHugh (U.S. Patent No. 5,873,742), and McHugh (U.S. Patent No. 6,095,824) disclose connectors being soldered to printed circuit boards having contacts with solder portion.
